FEDERAL MILK ORDER

MARKET STATISTICS

AUGUST HIGHLIGHTS

MINIMUM CLASS I PRICE \$6.72; BLEND, \$5.97

PRODUCER DELIVERIES UP 3.4 PERCENT

PRODUCER MILK USED IN CLASS I DOWN 0.8 PERCENT

59 PERCENT OF DELIVERIES USED IN CLASS I

IN-AREA FLUID MILK SALES DOWN 0.8 PERCENT

TABLE OF CONTENTS

labre	NO.	rage No.	
	Summary	. 3	
1.	Federal order minimum Class I prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, September	. 5	
2.	Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, August	. 6	
3.	Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-August	. 8	
4.	Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, August	. 10	
5.	Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, August	. 12	
6.	Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I, January-August	. 14	
7.	Federal milk order Class I formula price information, August	. 16	
8.	Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, July with comparisons	. 18	
9.	Daily average sales of individual fluid milk products, selected Federal order markets, January 1970 to date, with comparisons	. 22	
10.	Percentages of whole milk used in the production of manufactured dairy products, selected marketing areas defined by Federal milk orders, January 1970 to date, with comparisons	. 24	
11.	Federal order base and excess prices for milk of 3.5 percent butterfat content, August	. 25	
12.	Seasonal incentive fund included under various Federal milk orders, August	. 25	
13.	Filled and imitation milk sales in Federal milk order markets, June, July, and August	. 25	
14.	Dairy product prices and manufacturing milk prices used in Federal milk order pricing formulas, January 1970 to date, with comparisons	. 26	
15.	U.S. milk prices, 3.5 percent butterfat basis, January 1970 to date, with comparisons	. 27	
16.	Retail prices paid by consumers for dairy products, United States, January 1970 to date, with comparisons	. 28	
17.	Prevailing prices paid by consumers for the most common grade of whole milk, 25 cities, September 1970, with comparisons	. 28	
18.	U.S. production, January 1970 to date, with comparisons	. 29	
19.	Commercial and Government storage holdings, January 1970 to date, with comparisons	. 29	
20.	U.S.D.A. purchases (Delivery basis), January 1970 to date, with comparisons	. 29	
21.	Milk deliveries, by State of origin, to handlers regulated under Federal milk orders, 1968-89	. 32	
22.	Total producer deliveries by State of origin, 1969	. 33	
	Major order actions, August	. 36

Mergers and Expansions. On August 1, 1970, the Washington, D.C., Upper Chesapeake Bay, and Delaware Valley marketing areas were merged into a single order area called Middle Atlantic. Also on this date, the Northwestern Ohio, Columbus, Miami Valley, Cincinnati, and Tri-State marketing areas were merged into a single area called Ohio Valley. Minor expansions of each of the new marketing areas occurred at the same time.

All eight of the order markets involved in the mergers were comparable and since the expansions were minor the merged markets will remain comparable. As has been done on market mergers in the past, data for the former markets are combined. As a result of these actions, the number of comparable markets has dropped from 64 to 58 for the month of August. The total number of milk orders in effect on August 1, 1970 is 62.

Minimum Prices. The weighted average Class I price paid by handlers regulated under 58 comparable Federal milk order markets for 3.5 percent milk in August 1970 was \$6.72 per hundredweight, 22 cents higher than the \$6.50 per hundredweight price in August 1969. (See table 2.) Class I prices announced for September 1970 with comparisons with September 1969 are shown on table 1.

Producers in the 58 markets received a weighted average blend price of \$5.97 per hundredweight for 3.5 percent milk in August 1970, 20 cents higher than the \$5.77 price received by producers in August 1969. Class prices, blend prices, and associated butterfat differentials, by markets, are reported on table 2.

The weighted average Class I price for the January-August period for the 58 markets was \$6.72, 26 cents higher than the \$6.46 price for the same period in 1969. The weighted average blend price for January-August was \$5.83, 23 cents higher than the blend price of \$5.60 reported for the same period in 1969. (See table 3.)

Producer Deliveries. A total of 134,463 producers delivered 5.0 billion pounds of milk to handlers in the 58 markets during August 1970. The volume is 3.4 percent above producer deliveries in August 1969. Average daily delivery per producer increased from 1,128 pounds in August 1969, to 1,194 pounds in August of this year. Producer number, producer deliveries, average butterfat percentages, and average daily delivery per producer for individual markets are shown on table 4.

Producer deliveries during the first eight months of 1970 totaled 41.0 billion pounds in 58 markets, 3.7 percent above producer deliveries made during the same period in 1969. (See table 6.)

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 58 markets decreased 0.8 percent from last year, to a total of 2.9 billion pounds for August 1970. (See table 5.)

The volume of producer deliveries used in Class I during the first eight months of 1970 in 58 markets, totaled 24.5 billion pounds, 0.4 percent below such Class I use during the same period in 1969. (See table 6.)

Percentage of Producer Deliveries Used in Class I. The average utilization percentage in 58 markets for August 1970 was 59 percent, two percent below that in August 1969. (See table 5.) The average utilization percentage in 58 markets for the first eight months of 1970 was 60 percent, compared to 62 percent for the first eight months of 1969. (See table 6.)

Producer Deliveries Used in Other Than Class I. The volume of producer deliveries used in other than Class I products in the 58 markets totaled 2.0 billion pounds in August 1970, 41 percent of producer deliveries. Table 10 shows for 61 markets where data was available, the percentage of whole milk equivalent used in manufactured products during the first seven months of 1970.

Filled and Imitation Milk Sales. Survey data of filled and imitation milk sales in Federal order markets during June, July, and August are presented on table 13.

Fluid Milk Product Sales. Total in-area sales for August 1970 are estimated to be about 2.4 billion pounds 0.8 below such sales in August of last year.

Total fluid in-area sales for July 1970 were 0.9 percent above sales for July 1969. This increase was the result of an 8.1 percent increase in sales of skim and lowfat milk items, which more than offset decreases of 0.9 percent, 6.4 percent, and 0.9 percent, in sales of whole milk, mixtures, and cream items, respectively. Complete July in-area sales for total fluid items, and the four major product groupings (whole milk, skim milk items, mixtures, and cream) are reported on table 8.

For the first seven months of 1970, total in-area sales of fluid milk items in Federal milk order markets where comparable data were available, were 0.3 percent below total fluid sales for the same period in 1969. Sales were up for many skim milk items, continuing a trend that started a few years ago. Sales of plain lowfat (2%) milk, and lowfat (2%) milk with solids added continued to show the largest increases, increasing 22.7 percent and 11.8 percent, respectively. Sales of all other fluid milk items, with the exception of flavored whole milk, were down from the first seven months of the previous year. Whole milk sales were down 2.4 percent: sales of milk and cream mixtures were down 7.0 percent; and, sales of cream items were down 4.2 percent. Daily average sales of individual fluid milk products are shown on table 9.

Total fluid in-area sales; changes in sales and butterfat content of the four major fluid milk product groups and total fluid products

^{1/} Sales routes of handlers may extend outside defined marketing areas. In some cases, such handler in-area aales are partially estimated.

^{2/} Plain, flavored, and fluid equivalent of concentrated.
3/ Plain, fortified, and flavored skim and part skim milk, buttermilk, and cultured specialties.
4/ Sales represent the area after the 1969 amendment. (The May 1, 1969 amendment merged the Eastern Ohio-Western Pennsylvania and Clarksburg markets.)

5/ Sales for marketing area as defined after the 1969 amendment.

6/ Small amount of sales estimated.

1/ Data represent whole milk equivalent based on milkfat content. Includes producer milk and some other source milk used to produce manufactured dairy products in regulated pool plants as well as milk diverted and shipped to nonpool plants for processing. Some of the data are partially estimated. See table 8 for markets included.

2/ Includes evaporated and dry whole milk, milk used in candy, soup, bakery products, etc.

5/ Includes purchase of evaporated milk of 45 million pounds, January to date 1970 and 107 million pounds, January to date 1969.

MILK DELIVERIES BY STATE OF ORIGIN

Milk receipts from producers at plants regulated under 67 Federal milk marketing orders during 1969 were slightly over 61 billion pounds, 56 percent of the 108 billion pounds of milk delivered to plants and dealers in the United States. The value of milk delivered to Federal order plants at order blend prices totaled more than 3.6 billion dollars, 61 percent of the cash receipts from milk sold to plants and dealers in 1969. Milk receipts at regulated plants equaled 78 percent of whole milk marketings in the country eligible for fluid use (fluid grade). Sales of fluid milk products by Federal order handlers, however, represented slightly less than 75 percent of the fluid milk sales in the United States, indicating that Federal order markets carry a greater proportion of the surplus of fluid grade marketings than markets not subject to Federal orders.

In comparison, Federal order milk deliveries in 63 markets during 1955 amounted to 28.9 billion pounds, 32 percent of the 91 billion pounds of milk delivered to all plants and dealers in the United States. Slightly more than half of the fluid grade milk in the country was delivered to Federal order plants. Fluid product sales by Federal order handlers represented about 37 percent of the sales of fluid milk products in the United States.

The following data give one measure of the increasing importance of the Federal milk order program to the dairy industry, particularly the fluid milk sector, and illustrate the growth of the order program.

1969	*	108,442	72	::	61,029	78	56

1/ Computed from data contained in "Milk Production, Disposition, and Income," 1968-69.

Since Federal orders only regulated the marketing of milk which meets Grade A requirements, it is to be expected that Federal order receipts in most States represent a higher percentage of fluid grade marketings than of total marketings. The differences in percentages are more pronounced in the States which have large supplies of manufacturing grade milk. For example, in Minnesota, Federal order receipts in 1969 accounted for 82 percent of the milk marketings eligible for fluid use, but only 19 percent of the total milk sold to plants and dealers in that State. Large differences between these percentages can also be found for Wisconsin, Iowa, Missouri, and South Dakota.

Conversely, these percentages (Federal order deliveries as a percentage of fluid grade, and all milk) are higher and closer together in the States which have large supplies of fluid grade milk. For example, in the New England States where virtually all the milk produced in 1969 was fluid grade, deliveries to Federal order handlers constituted over 85 percent of all milk delivered to plants and dealers. In New Jersey, Maryland, Florida, Texas, New Mexico, and Arizona over 95 percent of fluid grade milk was delivered to Federal order dealers in 1969 and these deliveries represented better than 95 percent of all milk deliveries in these six States. There were 22 other States where fluid grade producers marketed more than 80 percent of their milk to handlers regulated under Federal orders.

The proportionate increase that Federal order deliveries are of fluid grade and all milk deliveries is primarily due to the increase in conversion of manufacturing grade to fluid (Grade A) marketings and the increasing numbers of producers who have turned to Federal orders. Deliveries to Federal order plants, and the percentage these deliveries are of fluid grade and all milk delivered, by States, are shown in table 21.

A closer look at total marketings and deliveries to Federal orders by producers in the leading milk producing States may provide some insight into the changing milk supply patterns for Federal order markets.

^{2/} Statistical Bulletin No. 453, "Federal Milk Order Market Statistics," 1969.

 $^{3/\}mbox{\ "Grade A"}$ in most States. Includes fluid grade milk used in manufactured dairy products.

MILK DELIVERIES BY STATE OF ORIGIN -CONTINUED

Top ten states delivering to Federal orders; deliveries to Federal orders as a percentage of total deliveries to Federal orders; and marketings as a percentage of total U.S. milk marketings; 1960, 1965, 1967, and 1969

51.4

The relationship between a State's importance to Federal orders and its importance to total U.S. marketings has not always been as close. In 1967, only six of the top ten States in importance to Federal orders also ranked as one of the top ten States according to total marketings in the U.S. Similar situations existed in 1965 and 1960, although States and positions changed.

Inspecting individual market situations shows that in 1969, the primary source of producer milk for most Federal order markets was the State(s) in which the marketing area was located. Table 22 shows the States deliveries to each market, the quantity of milk delivered, and the percentage that each State's deliveries were of total deliveries to the market.

There were 12 markets in 1969 which received all of their milk from the State in which each was located. Ten markets each received their milk from two States and 15 markets each received their milk from 3 States. Eastern Colorado, Massachusetts-Rhode Island-New Hampshire, and St. Louis-Ozarks each received their milk from seven States; and Delaware Valley, Eastern Ohio-Western Pennsylvania, and Southern Illinois each received their milk from eight States.

Twenty-five of the 67 markets effective in 1969 received more than 90 percent of their deliveries from one State; 21 of these markets received more than 95 percent of their deliveries from one State. There were only six markets which did not receive 50 percent or more of their total deliveries from any one State.

Detailed information on sources of milk, is published every other year in a report entitled "Sources of Milk for Federal Order Markets by State and County" (C&MS-50). The latest issue of this report is for 1968 and contains sources of milk information for December 1967. The 1970 publication, containing information for 1969 will be available in the near future.

 $[\]frac{1}{2}$ / Revised data for 1968 and preliminary for 1969. $\frac{2}{2}$ / Total deliveries of milk by producers in each State to handlers regulated under Federal milk orders. In most

markets yearly deliveries by State are based on the relationship of deliveries in one month.

3/ Computed from data contained in "Milk Production, Disposition, and Income," 1968-69.

4/ Percentage Federal order deliveries are of milk sold to plants and dealers that is eligible for fluid use ("Grade A" in most States).

^{5/} Not published to avoid disclosing individual operations for manufacturing grade milk.

^{6/} Less than one-half of one percent.
7/ Less than 500 thousand pounds.

^{1/} Total deliveries of milk by producers in each State to handlers regulated under Federal milk orders. In most markets yearly deliveries by State are based on the relationship of deliveries in one month.

^{2/} States in parenthesis delivered less than 3 million pounds.

3/ Merger of Clarksburg and Eastern Ohio-Western Pennsylvania marketing area effective May 1, 1969.

4/ Pricing provisions effective April 1, 1969.

5/ Pricing provisions effective May 1, 1969.

Amendments:

Middle Atlantic - August 1 (35 FR 10273, 6/24/70). This amendment merges the Delaware Valley, Upper Chesapeake Bay, and Washington, D. C. marketing areas. The amendment adds to the merged area the counties of Kent and Sussex and the remainder of New Castle, in the State of Delaware, and Loudoun County in the State of Virginia. Population (1960 Census) 9,084,161.

The consolidated order is similar to the Delaware Valley order with the following major changes. A distributing plant must dispose of at least 50 percent of its Class I receipts (except filled milk) and at least 10 percent of such receipts must be disposed of on routes in the marketing area. A supply plant must ship at least 50 percent of its Grade A receipts (except filled milk) to pool distributing plants during each of the months of September through February, and 40 percent during each of the months of March through August. Provision is also made for pooling, under specified conditions, certain reserve processing plants which have long been associated with the fluid milk market. This amendment limits a producer-handler's receipts from pool plants to not more than 10,000 pounds during the month.

"Fluid milk product" definition includes milk, skim milk (including concentrated and reconstituted milk or skim milk), buttermilk, cultured buttermilk, flavored milk, plain or flavored milk drinks, filled milk, any mixture in fluid form of cream and milk or skim milk containing less than 10 percent butterfat (except ice cream, ice cream mixes, ice milk mixes, milkshake mixes, eggnog, yogurt, condensed or evaporated milk and any product which contains six percent or more normilk fat or oil.

The <u>Class I price</u> is \$7.11 plus any amount by which the Minnesota-Wisconsin price (on a 3.5 percent butterfat basis) for the preceding month exceeds \$4.33. The <u>Class II price</u> is the Minnesota-Wisconsin price, limited by a butter-powder "snubber", and adjusted seasonally.

Amendment provides a <u>base-excess plan</u>. Bases would be established on the basis of a producer's <u>deliveries</u> during the August through December period and would be effective for the 12-month period of March 1 through February of the following year. Transfers are limited to circumstances of death or discontinuance of milk production because of entry into military service. A new producer may acquire a base on a percentage of his monthly deliveries.

Location adjustments would apply to plants located 55 miles or more from the city hall in Philadelphia and also 75 miles or more from the nearer of the zero milestone in Washington, D. C. or the city hall in Baltimore, Maryland. The Class I price is reduced at the rate of 1.5 ceuts per 10-mile distance or fraction thereof that such plant location is from the nearest of such basing points. Provision is made for payment by each handler of a direct delivery differential of six cents per hundredweight on producer milk received at plants located within 55 miles of Philadelphia. Amendment also provides for a marketing service deduction of 5 cents per hundredweight.

Ohio Valley - August 1 (35 FR 10567, 6/30/70). This amendment merges the Cincinnati, Columbus, Miami Valley,
Northwestern Ohio, and Tri-State marketing areas. The amendment adds the following counties to the merged area:
Adams, Auglaize, Brown, Clinton (remainder), Darke, Hardin, Highland, Hocking, Knox, Logan, Mercer, Morgan, Noble,
Perry, Pike (remainder), Ross, Shelby, Vinton and Wyandot, in the State of Ohio; Bracken, Lewis (remainder), Mason
and Robertson, in the State of Kentucky; Dearborn and Ohio, in the State of Indiana; Calhoun, Gilmer, Mingo, Pleasants,
Richie, and Wirt, in the State of West Virginia. Population (1960 Census) 6,763,383.

A <u>distributing plant</u> must dispose of at least 50 percent during the months of September through February, and 45 percent during the months of March through August, of its total receipts of fluid milk products (except filled milk). At least 15 percent of such disposition must be on routes within the marketing area. A <u>supply plant</u> must ship at least 50 percent of its total receipts of fluid milk products (except filled milk) to pool distributing plants. If this qualification is met during each of the months of September through February, the plant has automatic pool plant qualification for each of the months of March through August. A <u>cooperative association plant</u> must deliver at least 50 percent of the milk of its producer-members either directly from farms or by transfer from its plant, to pool distributing plants.

A handler may divert the milk of any producer if at least 2 days' production of the producer is physically received during the month at the plant from which his milk is diverted. During the months of September through February, the quantity of milk of a producer diverted to nonpool plants, measured in terms of days of production, may not exceed the quantity of the producer's milk physically received at pool plants.

Class I milk is all skim milk and butterfat disposed of in the form of a fluid milk product, in end-of-month inventory of packaged fluid milk products, and not accounted for as Class II or Class III milk.

Class II milk is all skim milk and butterfat disposed of as fluid cream or as mixtures of cream and milk or skim milk containing 10.5 percent or more butterfat; used to produce yogurt, sour cream, sour mixtures, cottage cheese, cottage cheese curd, pancake mixes, and puddings; and, disposed of in bulk to commercial food processors.

Class III milk is all skim milk and butterfat: Used to produce butter, nonfat dry milk, dry whole milk, dry whey, dry buttermilk, casein, cheese (except cottage cheese and cottage cheese curd), frozen cream, milk shake mixes containing 15 percent or more total milk solids, frozen desserts, frozen dessert mixes, dietary products and infant formulas in hermetically sealed metal or glass containers, evaporated or condensed milk or skim milk in plain or sweetened form, and any product containing six percent or more nonmilk fat (or oil); dumped or disposed of for livestock feed; in end-of-month inventory of bulk fluid milk products and bulk cream; and, in shrinkage.

The <u>Class I price</u> (Central Zone) is the Minnesota-Wisconsin price for the preceding month plus \$1.50 and plus 20 cents. The <u>Class II price</u> is the Minnesota-Wisconsin price for the month plus 10 cents. The <u>Class III price</u> is the lower of the Minnesota-Wisconsin price for the month or a butter-powder formula price. The butter-powder formula in the order is: (Chicago 92-score butter price x 4.2) plus (Chicago area spray price x 8.2) minus 48 cents.

The Class I butterfat differential is the Chicago 92-score butter price for the preceding month times 0.12.

The Class II and Class III butterfat differential is the Chicago butter price for the month times 0.115. The producer butterfat differential is the weighted average of the Class I, Class II, and Class III differentials.

Location adjustments would apply to plants located outside the Central Zone. At a plant in the Southeastern Zone, the Class I price is increased five cents. At a plant in the Northwestern Zone, the Class I price is decreased five cents. At a plant outside the marketing area and 60 miles or more from the nearest of 10 basing points the Class I price is reduced 11 cents and an additional 1.5 cents for each 10 miles or fraction thereof over 70 miles.

Order also includes a seasonal incentive payment plan (Louisville plan) with April through July as "take-out" months, and September through December as "pay-back" months. The expense of administration is four cents per hundredweight and the marketing service deduction is six cents per hundredweight.

Southern Illinois - August 1 (35 FR 12267, 7/31/70). This amendment allows for unlimited diversions during the months of May, June, and July. During the months of August and December, not more than 12 days' production of a producer may be diverted and not more than 8 days' production may be diverted in all other months.

This amendment removes the mileage limitation on milk diverted in bulk to a nonpool plant for Class II use. Action also revises the location adjustment provision to provide that the Class I price at a plant outside the marketing area and in the State of Illinois south of the northernmost boundaries of the Illinois counties of Adams and Schuyler and at a plant in the Indiana counties of Fountain Parke, Vermillion, and Warren be the Class I price applicable at a pool plant location in the northern zone.

Suspension:

Southern Michigan - August 1 (35 FR 11381, 7/16/70). This suspension continues for the months of August through December 1970, the classification of yogurt as a Class III product rather than as a Class I product.

Terminations:

Eastern Colorado - August 15 (35 FR 13007, 8/15/70). This termination action deletes the supply-demand adjustor to the Class I price from the order.

Middle Atlantic - July 17 (35 FR 11455, 7/17/70). Certain text relating to the computation of handlers' obligation to the pool for other source milk used in Class I was deleted from the order provision for clarification.
